

WWW.THINKBEFOREYOUSTINK.COM

What's in Your Perfume? Laundry Products? Air Freshener?

The majority of these types of products contain:

Neurotoxins - Damage the nervous system and brain

Endocrine Disruptors - Disrupt hormone functioning

Carcinogens - Contribute to cancer cell development

Mutagens - Alter the genetic material inside cells.

Allergens - Cause/contribute to allergic reactions

Reproductive Chemicals - Contribute to sterility or reduced fertility

Teratogens/Embryotoxins - Interfere with normal embryo/fetus development

Do you know how the products you use affect you and the people around you? Check out www.ThinkBeforeYouStink.com and learn how to reduce your chemical & fragrance footprint, improve your health, and make your home or business safe and accessible for all.

GO FRAGRANCE-FREE / NON-TOXIC !
